## Better Seed --- Better Crops

True-to-variety crops yield better and grade higher, hence bring in more money to the producer. Good seed will produce such better crops. Our Company makes available to farmers, at cost, at each one of its elevators, some of the very best Registered and Certified seed of the standard recommended varieties.

## HOW TO "KEEP EDUCATED"

Read Daily the World-Wide Constructive News in  
**THE CHRISTIAN SCIENCE MONITOR**

An International Daily Newspaper

It gives all the constructive world news but does not report crime and scandal. Men like the editor, "The World's Day" means it is a place for the very reader. It has interesting features, news for all the family. A weekly magazine section, written by distinguished authorities, on economics, social and political problems, gives a survey of world affairs. We are now and then give you one new and one old one that you can use for the day.

## Notes of Sports.

Despite the cold weather, the Junior hockeyists played a return game at Wabamun on Sunday, and made a record score over the Lakers. Those who went up were: E. Leeder, P. & B. Gannon, Hy. Yensen, Ben Seegle, Goalie Albert Wudel. Referee — F. Schulte.

There was no Sunday afternoon skating at the local rink.

Geo. Trapp has taken over the management of Juvenile hockeyists, at the urgent request of the players; 3 teams are being organized, and will be ready for action; later, games will be played between each other, and with outside teams.

## Graden-McKinlay.

The wedding of Florence Ethel, youngest daughter of Mr. and Mrs. M. McKinlay, and Gordon Alan, son of Mr. Thomas Graden, and the late Mrs. Graden, was solemnized at the home of the bride's parents, on Saturday, Dec. 28. The bride, given in marriage by her father, was charming in a gown of French blue crepe with matching jacket. She carried a bouquet of pale yellow roses and carnations. Miss Ruth Leeder played the Wedding March. Following the service, a reception was held to some thirty score guests. Music and dancing were arranged for the rest of the evening.

## The Boys' Parliament.

At the meeting on Monday night of the Tuxies, with the Praetor in the chair, the report of the delegate sent to the recent session of the Boys' Parliament, Mr. Walter Larson, was read. Following is the report, in part—

"The entire proceedings at the opening of Parliament was very interesting to those of us who attended for the first time. There was an exciting time on the debate on the Speech from the Throne; the leader of the Opposition going so far as to intimate it had been copied from last year. The supporters of the Government took exception to this insinuation.

Following this, the rules of the House were temporarily suspended, to receive greetings, which were then given by his worship Mayor Cooke; representatives from Alberta Boys' Work Board, the Boy Scouts and others.

The Boys' Work Board has arranged to print the proceedings of the Boys' Parliament. This journal may be had by every Tuxi.

We heard a number of addresses, among these being a very interesting one by A. E. Otwell, who spoke on "The World Situation of Today." This address was given very close attention by the Boys, as also was the addresses by the other speakers who followed.

## Disease and Death

Technocrats, engineers and scientists have said more than once recently that research work in the laboratories and workshops of the world have brought such a rich harvest in discoveries that the fruits of their work have far outrun man's ability to turn them to immediate use in enrichment of everyday life. This, it is said, is largely due to the lack of sufficient purchasing power.

This general premise is undoubtedly correct. Discoveries in the scientific realm during the past decade have been overwhelming in number, scope and future potentiality, and not the least interesting and important is the last-mentioned. For, experience shows that every new discovery opens up wide vistas for future research, paving the way for further discoveries and yielding visions of more and greater uses which the earlier experiments can be made to yield for the comfort and welfare of humanity. There is, at any rate at present, no cul de sac in the scientific field.

Not only is there no apparent terminal, but the more the scientist and research worker reveals, the more he is assured that he knows very little, that so far the surface has been barely scratched, and that the realms yet to uncover and conquer are almost limitless. The finite knowledge of the present points far into the infinite with inexhaustible treasures yet to find.

While this is true in all fields of scientific discovery, in no sphere is it more true than in the realm of medical science. Medical science and surgical skill have made tremendous and important advances in the past few years, but while much has been learned, while many new and valuable methods of preventing, curbing and eradicating disease have been discovered and pressed into service for the alleviation of suffering and prolongation of life, just about enough has been achieved to demonstrate that more will be learned and much greater results will be accomplished in the next few years, provided the work that is now being prosecuted with vigor and enthusiasm is not subjected to some unforeseen setback.

Until quite recently scientists in the medical and surgical fields have been chiefly concerned with perfection of technique in applying known methods for control and eradication of disease, with preventive and safeguarding devices and practices, with the search for cures for the most prevalent killers, such as heart disease and cancer and with the development of palliatives for pain.

In all these fields remarkable work has been done as is easily demonstrable in the case of tuberculosis. The progress that has been made in dealing with this and other diseases, in the prevention of loss of life in maternity and in the protection of children in the first few months of life, even since the Great War, has resulted in increasing the span of life expectancy, though, to date, this is principally due to the savings that have been made in infant mortality.

However, it appears that we may be upon the threshold of further discoveries that will benefit mankind in the later years of life's span. A vigorous drive is being made by science against those diseases which are taking heavy toll in middle life and old age, and more especially is the hunt for an antidote to that great and painful scourge, cancer, in full cry.

While still in the experimental stages, "enol" has brought hope that a specific cure for cancer has been uncovered. It has been demonstrated that at least this new remedy has robbed the disease of some of its attendant pain and there are hopes that it may turn out to be the long-sought cure. It should be pointed out, however, lest disappointment ensue, that the efficacy of enol as a definite cure remains to be proven.

Experimentation with enol, so far, is confined to a two year period and eminent practitioners declare that another three years must elapse before its success or failure can be pronounced.

While the object of all this work is to prolong the span of human life, medical science is not satisfied with such great achievements as research has already yielded, but is looking farther ahead, even to the extent of endeavoring to lift the veil which shrouds the mysteries of life and death.

Experiments along this line have yielded extraordinary results. Dr. Alexis Carrel of the Rockefeller Institute, for example, has kept a chicken's heart alive, apart from the body, for 24 years and this scientist recently predicted the possibility of suspending human life and starting it again several centuries later. Such experiments open up a vista of fascinating possibilities, but this same authority, while confident of great advances in the future expresses his firm conviction that "there is no hope of ever conquering senescence and death," though admitting the possibility of suppressing disease entirely in the future.

In other words man may conquer disease, but he will not be given dominion over natural decay and eventual death, in the opinion of this noted savant.

### Makes No Difference

Another couple has been married in an airplane. The consensus of opinion among our bachelor friends is that the groom comes down to earth just as quickly as though the ceremony took place on the ground.

### Sending Boys To Queensland

Arrangements are being made to send 10 Boy Scouts to Queensland every month from Great Britain. This announcement was made by the Settlers' League. In London negotiations are still in progress with Federal government for financial assistance, under the settlers' agreement, for the boys' passages to Queensland. On arrival, the boys will be given occupations, chiefly in farming.

### Should Stand By League

The business of this country says the Manchester Guardian is to stand with the members of the League, confirming their loyalty, giving them all the evidence that it can of its friendly spirit—both in this and in a broader field, for we ought to turn to good use this new international unity—and maintaining patiently the principle that the League must hold on until justice is done.

The "Pony Express" was not run with ponies, but with the most virile breed of horses.

### Was Remarkable Figure

Venezuela's Late President Will Be Hard To Replace

The most powerful Dictator in South America is dead. With the passing of Juan Vicente Gomez, President of Venezuela, there vanishes from the scene one of the most remarkable figures of contemporary politics. Born a cattleman, he joined Cipriano Castro in a revolution which was successful and which put the beetle-browed little Castro in the presidential chair. Gomez was content to remain his chief aide, but he commanded the army and he was in reality the power behind the throne. When Castro went away on leave of absence in 1908 he signed his own dismissal, for Gomez warned him not to return, pretending to be much concerned about rumors of plots against Castro's life.

Ever since then Gomez has ruled Venezuela with an iron hand, smashing ruthlessly any attempt against his power, giving the country a settled policy, building up its finances. Venezuela is the only nation in the world without a nickel of external debt—and making things attractive for foreign capital, so that British investments in the country increased from \$45,550,000 to \$131,860,980 in the four-year period prior to his death, and in 1933 the value of her exports was five times that of her imports.

The masterful dictator disliked crowds, and seldom went to the capital, Caracas, preferring to live a lonely and secluded life on his country estate. Many Venezuelans have never seen him. But he had his ear to the ground 24 hours a day, and he knew everything that was going on. He gave his country a long period of peace, but of course he made loads of enemies, for his methods were simple but drastic. Those he could catch, he shot; those who could escape from the country remained in exile. But in losing Gomez Venezuela has lost a ruler who was extremely difficult to replace.—Montreal Star.

### Canned Blood

Weird Discovery Listed As Major Accomplishment Of 1935

The weirdest discovery of the year "canned" blood—was listed by professional authority as medicine's foremost accomplishment of 1935.

A process of taking blood from the bodies of the dead and preserving it to save other lives through transfusions was placed first in a "year book of fame" compiled for the Associated Press by Dr. Morris Fishbein, editor of the Journal of the American Medical Association.

Russian doctors and chemists derived first rank for developing the "canning" method and using it successfully in more than 1,000 cases, the editor said.

### Snow Traps Golden Eagle

Unable To Rise From Ground After Diving For Rabbit

A giant golden eagle was killed near Frida, Alta., when it was unable to take off in soft snow after diving for a rabbit. Clayton Tompkins, of Calgary, shot the bird as it thrashed around in the drifts. The eagle had a wing spread of seven feet, two inches.

In preparation for a take-off, the eagle must spring into the air sufficiently for the wings to clear the ground. The deep, soft snow prevented the preliminary jump and each successful effort ended only to heighten the bird's predicament.

### Victim Of Science

Inoculation Slip Causes Death Of Assistant In Laboratory

Medical science claimed the life of Anna Pabst, young laboratory assistant at the National Institute of Health, who contracted meningitis in line of duty.

Miss Pabst, an experienced technician and co-author of several scientific articles, was inoculating an animal with meningitis culture on December 17, when the animal moved and some of the culture squirted into her eye.

In imitation of the American magazine Esquire, an English publisher has launched one called Men Only. As far as picking punk names is concerned, it looks like a dead heat.

### Best for all your Baking

# A New Geological Picture Of Earth's Recent History Shows Water Level Changes

All the oceans of the earth were a mile below their present level in a new geological picture of the earth's recent history announced by the Geological Society of America at the eve of its annual meeting in New York.

To-day's oceans, all of them, are lapsing over their edges, in a world far wetter than a few million years ago, and under the influence of a movement still only guessed at.

There is no sign of reason for believing that waters can rise still higher and engulf more dry land in a repetition of the Biblical flood. One basis of the Biblical flood stories might even be the mile rise of the oceans in the last few millions of years.

The unknown mechanism which raises and lowers the waters is believed to be glacial ice. It might also be aided by movements of the earth itself in which the bulging of the oceans enlarges at times so that their water levels fall.

The new evidence for this recent low water level will be presented at the opening session of the society's meeting. It is based partly on the findings of a new deep sea punch, to be described by Charles Snowdon Pigot, of the Carnegie Institution of Washington.

This punch can be dropped on a line a mile and a half deep. Touching bottom, it detonates small charges of power, causing the punch to lift off a bit of the bottom. It blows rock as easily as mud.

It has brought to the surface an amazing story. Instead of the mud and sediments which should cover the ocean bottom if they had been submerged for millions of years hitherto believed by geologists, the punch has brought up rocks, chipped off under water palaeozoic, some as deep as those of the Grand Canyon.

The punch has revealed that the "continental" shelf of the oceans, the area a few miles to scores of miles off shore, averaging about 600 feet deep, where the true sea bottom begins, is full of deep canyons and valleys, like highlands bordering a sea.

The conclusion is that they are the ancient and true sea shores, their bottoms representing the former sea levels. These bottoms seem to average a mile below present sea level.

## Deadly Level Crossing

Crossing Accidents Continue To Take Heavy Toll Of Life

Almost \$35,000,000 has been spent to make level crossings safer for the public, but crossing accidents continue to take a heavy toll, it was disclosed in information obtained from the board of railway commissioners.

The total number of accidents in the 11 months ended Nov. 30 was 214, which resulted in 104 deaths and injuries to 260, compared with 214 accidents, 81 deaths and 262 injured in the 12 months ended Dec. 31, 1934.

Canada cannot hope to eliminate grade crossings for many generations, for there are 31,253. Of this number there are 2,612 with warnings or protective devices, and 28,641 unprotected.

Since the inauguration of the grade crossing fund in 1909 a total of \$34,958,968 has been expended on bridges, subways and warning devices at railway crossings. Of this amount \$6,781,172 was contributed by the grade crossing fund, \$12,439,908 by the municipalities, and \$15,737,888 by the railways. In addition to this a considerable amount was sent by the railways and provinces of which the board of railway commissioners has no record.

## Canadian Bacon

First and second prizes were won by Canadian bacon in the competition for bacon produced in the British Empire at the recent 67th annual dairy show held in London, England. In addition, a considerable number of trade inquiries have been received from individuals and firms interested in the other Canadian products displayed—chilled poultry, butter, eggs, ham, milk powder, jelly powder and other commodities.

## To Stabilize Agriculture

West Will Plant Millions Of Trees This Year

Western Canada is bringing the forest to its farmers to stabilize its agriculture.

Providing shade in summer, shield in winter and aiding agriculture in their war on drought and soil drying, 145,000,000 trees have been planted as shelter belts on 85,000 farms in Manitoba, Saskatchewan and Alberta. In 35 years of systematic planting, five million more will be planted in 1935.

Norman M. Ross, chief of the tree planting division of the federal forestry service, said at Indian Head, and his assistant, C. A. Edwards, dipped into facts and figures and found the love of trees brought by farmers from older settled areas provides the incentive for the tree-planting program which is proving its value in dollars and cents to today's modern farmers.

To the credit of the tree planting program was placed better farm gardens, adequate protection against windstorms, improved appearance and added home comfort, retention of snow moisture, an aid in growing fruit successfully, protection for stock and poultry, attraction for bird life, protection against drought and provision of much fuel.

Fifty thousand trees were planted in 1931, first year the federal government directed the work. Since then, Manitoba has planted 19,700,230 broadleaf and 344,993 evergreens on 7,628 farms; Saskatchewan, 30,785,970 broadleaf and 1,781,218 evergreens on 32,705 farms and Alberta, 32,878,855 broadleaf and 661,370 evergreens on 15,128 farms.

## Re-Forested From Air

Tree Seeds Dropped From 'Tiger' Grown On Island

In making its first non-stop flight from the mainland to Hawaii, the U.S. army airplane Bird of Paradise scattered some seeds over a barren portion of the island of Kauai that was in 1929.

This week a "mystery forest" of thousands of kanaka trees was discovered by a group of boys building trails in Waimea canyon. The trees are native to New Zealand and not to Hawaii, therefore their presence was an enigma until the announcement was made. Planting had been done from the air in the mountainous portion through army co-operation with the territorial forestry board.

## Canadian Thrush

It is estimated that there are now about 4,000,000 pounds of Canadian thrushes available for export, and in order to increase the use of this Canadian grown thrush seed in Scotland, arrangements have been made at all the Scottish agricultural colleges to test the seed against that imported from other countries.

# Annual Cost To Canada Of Its Governing Body Runs Into High Figures

## Restocking Fish Streams

A New Policy To Attract The Tourist Trade

A new policy to restock thousands of virtually fished-out areas close to centres of population across Canada is being prepared by the government to meet the vexed problem, probed by the modern twin advancement of transport, better roads and the motor car.

Millions of dollars in tourist trade, chiefly from the United States, are at stake. The motive which, while the situation is being attacked by "sport fishing" is the best attraction to slow up the speed of the tourist and prolong his visit.

The program will go further than one of stocking and restocking barren water so far as good sport is concerned. Both have been carried on in recent years because of the depletion of hitherto isolated districts which became easy of access. Depending on the conditions of the waters, either small fry or the more fully grown fish have been used in restocking.

Two outstanding successes in stocking have occurred in Jasper Park. Speckled trout was introduced in Medicine Hat area shortly after 1923 and Rainbow and Klamath trout in Amethyst Lake more recently.

Details of the new policy will be completed shortly. The system in the state of New Jersey of placing full-grown fish in her deteriorated streams is frowned upon in Canada, however, as too costly and destructive to the sporting instinct of those who are prone to visit the mid.

## Canadian Maples In England

Tree To Be Planted In Boy Scouts' Training Ground

Twelve Canadian Maple trees are being sent to England by the Dominion Executive Board of the Boy Scouts' Association to be planted in Gilwell Park, the famous leadership training ground at the Boy Scouts, in memory of the visit to Canada last year of Lord Baden-Powell of Gilwell, Chief Scout of the World. A tablet will be erected near the trees indicating their origin. The funds for these maples were obtained through the generous contributions of members of the Council who also defrayed the cost of the loving cup presented to the Earl of Bessborough, Chief Scout for Canada during his term at governor-general.

The radio will never take the place of newspapers. You can't line the shelves with sound waves.

Government census high in Canada, both in the number of the legislators and the financial compensation given to them. To determine and direct the destinies of 11,000,000 people, Canada has no fewer than 280 representatives in its various parliamentary systems, of per capita, not of about one "representative" to every 12,000 of population. Of this number, 744 are elected and 120 appointed.

Equally rich in Canada is ministers of the crown, there being an even 200 distributed among one Dominion and nine provincial governments. The annual cost to the country in seasonal indemnities, ministers' salaries and allowances for speakers approximates \$2,100,000.

Only the Dominion parliament and the legislatures of Quebec confine the appointed upper house with an elected chamber, seven provinces have only one chamber, elected by popular vote. These are Nova Scotia, New Brunswick, Ontario, Quebec, Saskatchewan, Alberta and British Columbia. The third parliamentary system exists in Prince Edward Island where one-half of the legislature is elected by adult suffrage, while the other half is chosen by vote of property-owners.

In the Dominion and eight provinces all Canadian citizens, irrespective of sex, aged 21 or over, have the right to vote. In Quebec provincial elections that right has not yet been achieved by women.

Additional to these 100 taxing bodies, Canada boasts 53 cities and 342 towns. Counties and townships run into the thousands. All exercise the right of taxation.

## Edmonton Spring Show

Will Be Held In April With Changes In Price List

Dates for the Edmonton Spring Show have been set for April 6 to 9 and some of the changes in this year's price list include a change in the age of the junior exhibitors to 15 to 20 years inclusive and age of the children exhibitors is fixed at 11 to 14 years, inclusive. In the beef calf question two classes are provided, one for juniors and one for children with the weight limit fixed at 250 pounds and the pen feeding requirement eliminated. There are also two classes in the dairy calf section. In fairs there is a class for thoroughbred foals and also one for standard-breds. There are two new continuation classes, one for light foals and one for heavy draft foals. These classes are open only to exhibitors who showed the foals in the 1935 Spring Show. Prize money has been increased in many of the horse classes, in the group and carter classes, and weights in the single cattle classes are for animals weighing 900 pounds or under; 900 pounds to 1,050; 1,050 to 1,200 pounds; and over 1,200 pounds.

## First Exhibit Arrives

Covered Wagon Reaches Johannesburg Well Ahead Of Time

Nearly a year ahead of time, the first exhibit for the Empire Exhibition, to be held at Johannesburg, South Africa, from September, 1935, to January, 1937, has arrived at headquarters.

This curious development, which probably stands unique in the history of such shows, is due to an accident. A Dutch University College at the town of Potchefstroom came into possession of a covered wagon, very like those "Prairie Schooners" used by American settlers. It had survived an entire century since it helped to bring thousands of Boer Voortrekkers, or pioneers into the wilds of South Africa, where now the flourishing gold-mines Transvaal and other provinces exist.

Unable to house this venerable relic, the Council of the Potchefstroom University College sent it to the Empire Exhibition, which promptly accepted this item for its Transportation Section.

A little man thinks he solves just as much as a big man.

## Applique Is Easy Needlework

PATTERN 5504

You're in for a real "Dutch treat" when you invite this boy and girl from the land of windmills to live up your home and household linen. So easy to do in a combination of applique and outline stitch, patches for their clothes may be selected from any gay cotton scraps you have on hand. You'll find they make both colorful and amusing decoration for tea-cloths, breakfast sets, cushions and scarves.

In pattern 5504 you will find a transfer pattern of four squares averaging 7 1/2 x 8 inches, applique patches for their clothes, four motifs 3 1/2 x 2 1/2 inches, color suggestions, material requirements, illustrations of all stitches needed.

To obtain this pattern send 30 cents in stamps or coin (coin preferred) to Household Arts Dept., Winning Newspaper Union, 114 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published.

## Atlantic Air Service

Many Things To Be Considered Before It Is Started

The success of Pan-American Airways in establishing a trans-Pacific air service has inspired the movement to establish a similar service across the Atlantic, which will be greatly facilitated by the agreement that has been signed by the United States and Canada, Great Britain and the Irish Free State.

That the broader Pacific route has been conquered before the Atlantic, beyond which lies our principal commercial connections, was due partly to the necessity in the latter case of getting several countries to permit the landing of foreign planes on their soil. All of the stops on the trans-Pacific flight are on territory under American sovereignty, although an extension of the service from Manila to China is being proposed.

While weather conditions in the North Atlantic, at certain seasons of the year, are difficult to negotiate, there is not a "jump" on either route from London to New York, via Newfoundland, or on the route from London to New York, via the Azores and Bermuda, as long as the "hop" of 2,400 miles from San Francisco to Honolulu, which the Pan-American clipper has no trouble in taking.

There would seem to be no reason why, if the service across the Atlantic is planned and carried out as carefully as that across the Pacific was, this means of travel between Europe and America should not be safe and popular.—Detroit Free Press.

## Origin Is A Mystery

No One Really Knows How Turkey Got Its Name

Tradition has it that the first turkey taken to England by one of Sebastian Cabot's chief lieutenants. This is supported by the fact that William Strickland, who accompanied Cabot on several of his voyages, adopted a turkey rampant as his crest on being granted arms in 1583. At any rate, the popularity of the turkey as the principal item in the Christmas dinner menu has lasted well over 300 years. But if you think that the title "turkey" has anything to do with the country of that name you are mistaken. The bird is a native of North America, where it was discovered by the early Spanish navigators. Exactly how it got its name is a mystery. Some authorities suggest that the bird christened it, by its constant utterance of a sound that resembles "turkey-turkey-turkey." When you are tackling turkey, you may like to remind the company that the bird's succulent meat was so highly esteemed by sixteenth century churchmen that, by Archbishop Cranmer's orders, only "one dish of turkey cock" was permitted at feasts and banquets.

## Reform Law

Britain To Deal More Leniently With Offenders In Certain Cases

Committee to prison has hitherto been automatic in Britain if an offender who is fined with the alternative of imprisonment fails to pay his fine. This also applies to such cases as failure to pay local taxes or a wife's maintenance.

Under the Money Payments Act of 1935, which will come into force February 1, 1936, the offender who fails to pay must be brought before the court a second time instead of being taken to jail. Imprisonment will be a last resort when the magistrate, after inquiring into the means of the defaulter, become convinced of his bad faith.

The result will be that the offender who can pay but refuses will still go to jail, but the destitute will retain their liberty.

Napoleon's Arc de Triomphe, largest and most commemorative arch in the world, will celebrate its 100th anniversary July 28, 1936. It was completed during the reign of Louis-Philippe.

## ENJOY Your Meals

Would you like to go to dinner each day with a real appetite? Then take PHOSFERINE. Just a few tiny, economical drops each day. But what a difference they make! They lift you up. Strengthen you. Help you sleep and eat as nature intended you to. And give you new wells of energy. Get PHOSFERINE now. FOR

**Phosferine—Bismuthum—Germaral**  
Bismuthum—Germaral—Phosferine  
Anemic Condition—Indigestion—Rheumatism—Grippe—Neuralgia—Nervousness or Appetite

The \$1.50 size is nearly four times the 50c size and the \$1.50 size is twice the \$1.00 size.

## WORLD HAPPENINGS BRIEFLY TOLD

The American Red Cross receives \$5,482,535 from the estate of Mrs. Clara A. Hagwood Higgins Smith, whose gross estate was appraised at \$4,928,804.

The city of Quetta, destroyed by earthquake last May, will be rebuilt on the same site as far as possible, the Indian government announced. The cost is estimated at \$30,000,000.

The name of the Manchester Babies' hospital has been changed, with the consent of the Duchess of York, to the Duchess of York Hospital for Babies.

A proposed French budget for 1936 of 40,000,000,000 francs (about \$2,600,000,000) providing heavy expenditures for the French army and navy had the approval of the senate.

William Tate of Sherman, Texas, is looking for a thief who should be well fixed for stormy weather. Someone made off with the farmer's storm cellar, leaving nothing but a hole.

Eastern Canada is taking an interest in Vancouver's diamond jubilee celebration next year, too. The city council is informing eastern business leaders will contribute more than \$50,000 to the expenses.

Highway traffic in England has increased by close to 50 per cent. in five years, the British Automobile Association said after a survey conducted for seven days at important centres.

Speaker Joseph Byrnes of the U.S. house of representatives, said he would support proposals in congress for a stronger air force, an Alaskan aviation base and strengthened fortifications for Hawaii.

The 400 Indians and 200 white trappers operating in the Fort Arthur district will have quite a nest egg next spring. To Dec. 28, the value of their catch was \$50,000, to which is added \$4,500 in government bounties.

The Halifax Chronicle celebrated its 125th birthday recently. On Dec. 29, 1814, "The Nova Scotian" was first printed with Joseph Howe its editor and publisher. The name was changed to "The Morning Chronicle" in 1844.

The Soviet Union claims that its reserves contain almost three-fourths of the world's peat deposits.

Cuba is buying 100 times as much American rice as a year ago.

## STOPS ITCHING In One Minute

For quick relief from the itching of pimples, blotches, eczema, rashes and other skin eruptions, apply Dr. Dennis' pure, cooling, liquid, antiseptic D. D. D. Prescription. Thirty years' world-wide success. It gently soothes the irritated and inflamed skin, thus aiding nature itself to heal the disorder. No fuss—no mess. Clear, greenish and stainless—dries up almost immediately. Stops the most intense itching instantly. Try D. D. D. now. A 5c trial bottle, at drug stores, will prove its worth—money back. D. D. D. Prescription is made by the owners of Italian Balm.

## New Cunard White Star Liner

"Queen Mary" Has Novel Illumination Never Before Seen On Any Vessel  
The Cunard White Star liner "Queen Mary" will be the greatest "daylight" ship to take the seas, and will possess novel illumination schemes which have never before been incorporated in any vessel afloat.

At night the elaborate flood-lighting will transform the liner into a palace of colour, leaving a brilliant golden trail behind her as she glides swiftly across the dark seas.

But one of the principal features in the extensive use of glass throughout the ship, natural lighting is the keynote of the passenger accommodation lounges and dining-rooms. The promenade deck is almost encased in glass which will stand any weather.

In the hull alone 2,500 square feet of glass has been used for the portholes, while thousands of additional square feet, aggregating hundreds of tons, are included in the staterooms and public rooms.

But there are several other objects behind the idea of using so much glass in addition to providing greater comfort for the passengers and avoiding too much artificial light there are certain hygienic considerations, and a small army of window-cleaners will be kept busy washing and polishing the thousands of panes of glass. The "Queen Mary", in fact, is a window-cleaner's paradise.

All the first-class staterooms which face the open sea are fitted with long glass sliding windows. In the main lounge there are 32 windows, each 13 feet high, and the children's playroom has five windows 12 feet high.

A novel system has been used in the verandah restaurant. The ornate window-sills are actually electric radiators which maintain an even temperature.

On one side of the restaurant is a beautifully designed balustrade illuminated by ever-changing coloured lights hidden underneath.

The shopping centre is almost entirely constructed of glass. The outfitting shop has a frontage of 15 feet while many of the walls give the effect of a gigantic sheet of glass, so ingeniously have the big panes been fitted together.

## SELECTED RECIPES

### PLAIN DOUGHNUTS

2½ tablespoons butter  
1 cup sugar  
3 eggs  
¾ cups flour (about)  
4 teaspoons Magic Baking Powder  
½ teaspoon nutmeg  
1 teaspoon salt  
½ teaspoon cinnamon  
1 cup milk

Cream together butter and one half sugar. Beat remaining ingredients until very light and combine mixtures. Sift together 3 cups flour, baking powder, salt and spices and add to first mixture alternately with the milk, add enough flour to roll out to ¼-in.-thick discs, cut and fry in hot fat 375 degrees F. to a light brown. They should come to the top quickly. Turn once only. Drain on brown paper and roll in sugar.

To Test Fat: Put pan on fire and when smoke rises drop in small piece of dough. If it rises quickly to the top, fat is ready.

### No One Saw Eclipse

Last One For 1935 Visible Only At South Pole

Santa kept one Christmas treat for himself, the year's last eclipse of the sun.

It was visible in no inhabited part of the world and even Mr. Claus had to scan the sky from the ice fields of the South Pole.

For a few fleeting seconds, the Antarctic was shadowed by the veiled half-light of a sun reduced to a thin blinding circle. The eclipse lasted but a minute and 23 seconds from the time the moon began blotting out the sun's light until Old Sol shone again. Dr. Philip Fox, director of the Adler planetarium, Chicago, said:

It was the seventh eclipse of 1935—the maximum number possible in any year. It ended a series of heavenly phenomena which will not be seen again for 550 years.

The average weight of a dozen eggs is 1½ pounds. 2332

## Royal Bank Presents Strong Annual Statement

Deposits Up \$51,000,000—Marked Improvement Evident Last Year Continues

The Annual Statement of The Royal Bank of Canada reflects a very substantial growth during the year. Assets have crossed the eight hundred million dollar mark, being actually \$800,910,000. Deposits show an increase slightly greater than the rather remarkable increase shown in the previous year.

Assets have increased during the year by over \$42,000,000. That the growth of total assets is somewhat less than the increase in deposits is apparently accounted for by the fact that the special loan of \$9,000,000 under the Finance Act, current at November 30, 1934, has been repaid.

**Strong Liquid Position**  
In these days of easy money, no great emphasis is placed by the banks on liquidity but actually immediately realizable assets are 58 per cent of total liabilities to the public. Investments in Dominion and Provincial securities show an increase of \$61,716,525, which is in line with recent trends in banking, not only in Canada but in the United States and Great Britain as well. The banks have been more in as strong position as they are at present to meet commercial demands as these develop.

**Deposits Largely Increased**  
Deposits registered a growth of \$51,000,000 and now stand at \$688,366,512. A decrease in interest-bearing deposits is noted. It is understood that this does not indicate a reduction in Savings deposits in Canada, which have actually increased sub-

stantially, but is accounted for by the discontinuance of the payment of interest on a large proportion of the bank's deposits outside of Canada. It is no doubt a reflection of greatly improved business throughout the country that the growth under this heading during the past two years has been no less than 17½ per cent.

**Commercial Loans Up**  
Commercial loans show a moderate increase of \$2,038,882, which is encouraging when it is taken into consideration that general experience has not yet indicated that demand for new loans has more than offset liquidation of slow advances carried in the depression. Call Loans in Canada also increased by \$2,598,033 but Call Loans abroad are down \$10,690,196. As is well known, the yield on such loans in London and New York is about at the vanishing point.

**Profit and Loss Account**  
Profits for the year amounting to \$4,340,522 show a slight decrease but were sufficient to provide for \$2,800,000 in dividends, \$200,000 for transfer to Bank Premises account, \$200,000 to be applied to the Officers' Pension Fund and \$1,037,772 for Dominion and Provincial Government taxes, leaving a surplus of \$10,700,750 to be added to Profit and Loss Account, which now stands at \$1,609,564.

The Annual General Meeting of the Shareholders will be held at the Head Office of the bank in Montreal on Thursday, January 9th at 11 a.m., when the report for the year ended November 30th will be submitted.

## Peasants Order Gas Masks

Arabs Near Jerusalem Not Taking Any Chances On War

Eighty Arabs from two villages outside Jerusalem have placed orders for British gas-masks with a local agent. Each mask will cost \$20.

The example was started by a peasant of the village near Jerusalem. He bought a mask and told the agent that, if war came, it might save the lives of his three wives and eight children. If Allah decreed there should be no war, the hideous mask could hang on his wall, he said, and so incite his neighbors to envy and admiration.

"How can you divide one mask among your family of eleven?" asked the merchant.

"By the will of Allah," the Arab replied, "it shall be divided so that all have a chance of wearing it."

Now 80 neighboring peasants also want gas-masks for wall plaques.

## From Old Irish Term

Uisgebaugh is a potent liquor made in Drogheda, Ireland. Literally translated the word means "mad water." It is the abbreviation of the name of the drink to "uisge," gradually it became whiskey. In Molucca there is a beverage called "the tears of the widow of Malabar." Curacao, named for an island in the West Indies, is made from Seville (Spain) oranges.

## Fillet Crochet for a Smart Touch

PATTERN 5252

The magic of filet crochet is yours to discover—easily and inexpensively, with crochet hook, a bit of string, and this lovely pattern. A handsome chair set such as this, is very easy to make, and will protect your favorite chair at points of greatest wear. See how effectively graceful chrysanthemums contrast with the lace stitch that surrounds them! The same dainty design will make a pair of scarf ends, or useful table mat.

In pattern 5252 you will find a chart and complete instructions for making the set; illustrations of the set and of all stitches used and material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Household Arts by Alice Brooks

Crochet New Accessories For Your Living Room

Production of motor cars and trucks increased about 30 per cent. Output of boot and shoe factories grew by 23 per cent. Newspaper production the heaviest since 1923 and seven per cent. greater than in 1934.

General industrial production increased about 15 per cent.

Mining companies' increased their output of metals by 18 per cent.

Export sales of copper expanded by about 30 per cent.

Steel plants' increased production by about 40 per cent.

Number of people employed estimated at 100,000 more than in previous year.

Sales of cattle in Canadian stockyards 18.5 per cent. greater than in previous period.

## Woman Was Good Ship

Algoma wolves are keeping clear of Mrs. J. W. McCoy's back door.

Mrs. McCoy went to Sault Ste. Marie, Ont., to collect the \$15 bounty on a large wolf she laid low with a bullet from a .22 rifle.

## Auction Held Every Year

Proceeds Of Wine Sale Go To French Hospital

Wine from grapes of an orchard provided by Philip the Good in the 15th century was sold at auction in Beaune, France, amid splendor and festivities changed little since medieval times.

Wine-buyers who mingled with singing and dancing townfolk clad in old Burgundian costumes spent about \$30,000 for the wine sold by the Hospital of Beaune.

Philip the Good, then Duke of Burgundy, endowed the hospital with the vineyard that its earnings might provide care for patients unable to pay.

The auction is held annually in the dimly-lit hall of the hospital, the bidding continuing only during the burning of a candle. Many of the finest burgundies in the world are marketed at the famous auction.

## PRINTING PRESSES FOR SALE

One Fony Opticon Cylinder Press, one 12 and one 12 1/2 in. Chandler & Price Gordon Press. Also 28-inch Gullotine Paper Cutter and one Linotype machine. All in excellent condition. Apply Box 326, Regina, Sask.

Seventeen years' experience in the printing business. All work done to order. Estimates free. Address: Box 326, Regina, Sask.

## SEVEN YEARS' AGONY ENDED BY SASKASAL

First Bottle Brought Relief from Painful Rheumatism

Read this letter: "I had rheumatism for seven years and never got one night of sleep, pains something awful. I tried everything I could get, but nothing did me any good. I had finished the first bottle. I can go to bed and don't have any pain. I had before I took Saksal. I will ever recommend it to anyone that has rheumatism."

If you suffer from rheumatism, lumbago or sciatica start taking Saksal Mineral Salts now. At all drugstores—enough for 10 weeks' treatment 95c. 11

## SUNDAY SCHOOL LESSON JANUARY 12

### A PROPHETIC VISION

Golden text: Mine eyes have seen thy salvation, which thou hast prepared before the face of all peoples. Luke 2:30.

Lesson, Luke 2.

Devotional reading: Isaiah 49:1-13.

### Explanations And Comments

The birth of Jesus and the Story of the Shepherds, Luke 2:1-20.

The story of the birth of Jesus as related by Matthew is in striking contrast with that of Luke. Matthew depicts Jesus as a king and at his birth the reigning Herod trembles on his throne, and his advisers are plotting to offer him gifts. Luke represents Jesus as the ideal Man, and his story of the birth is full of human interest. It describes two obscure peasants journeying from their northern home in Nazareth to Bethlehem, and there excluded from the inn, placing in a manger their newborn Babe, while the first to visit them are humble shepherds from the neighboring plain. Human interests, however, are more nearly earthly interests; the story is vocal with heavenly melodies and interwoven with messages of divine meaning and grace" (C. E. Ryan).

The Expected, Simeon, Luke 2:25-26. Nothing is known about Simeon save what is here told. He was righteous and devout (literally, God-fearing) and was looking for the consolation of Israel, a phrase common among the rabbis for the messianic age. Christ was to come after a time of great distress, therefore he was spoken of as the Comforter.

Simeon's Words to Mary, Luke 2:31-35. No wonder the Babe's father (Joseph) held the place of a father to Jesus and mother to Mary, Simeon's words. Simeon blessed them and said to Mary, "Behold, this child is set for the falling and the rising of many in Israel; and for a sign that is spoke against." "This child is set for the falling and the rising of many in Israel; and for a sign that is spoke against." "This child is set for the falling and the rising of many in Israel; and for a sign that is spoke against."

Simeon's words. Simeon blessed them and said to Mary, "Behold, this child is set for the falling and the rising of many in Israel; and for a sign that is spoke against." "This child is set for the falling and the rising of many in Israel; and for a sign that is spoke against."

Simeon's words. Simeon blessed them and said to Mary, "Behold, this child is set for the falling and the rising of many in Israel; and for a sign that is spoke against." "This child is set for the falling and the rising of many in Israel; and for a sign that is spoke against."

## REDUCED TARIFF RATES ON CATTLE NOW IN EFFECT

Washington.—Although the reduced tariff rates which became effective on some classes of cattle imports from Canada are available also to Mexican shippers, a state department spokesman said Mexico has virtually no cattle of the weights affected.

Under the Canadian-American trade treaty the rate on cattle weighing 700 pounds or more each was cut from three cents to two cents a pound, and the rate on a limited quantity of calves weighing less than 175 pounds each was reduced from 2½ cents to 1½ cents a pound.

The duty on not more than 20,000 head of dairy cows weighing 700 pounds or more each was dropped from three to 1½ cents.

These concessions were extended automatically to other nations, with the exception of Germany, under the administration's policy of giving to all countries, which do not discriminate against American trade the same treatment accorded "the most favored" nation.

The department spokesman said, however, the weights specified in the Canadian treaty were selected carefully so that only Canada would benefit.

## Imperial Airways Crash

Nine Passengers and Three Members Of Crew Perish

London.—Hope was abandoned for 12 persons lost in the Mediterranean crash of the Imperial Airways liner City of Khartoum.

Crane-equipped tugs worked in 13 fathoms of water off Alexandria, Egypt, attempting to raise the liner and find the bodies of the victims.

The nine passengers and three members of the crew plunged with the plane beneath the sea a few minutes short of an Alexandria landing, apparently with all three motor dead. The only survivor, Pilot Vernon Gorry Wilson, was in a critical condition aboard H.M.S. Brilliant, which took him from the water.

Two women were among the passengers, all but two of whom were Britons. One was an Italian and one an American.

Pilot Wilson, who was in the water for five hours before the Brilliant found him, was too weak to be questioned as to the cause of the tragedy, the worst Imperial Airways accident in two years.

The admiralty, however, said in a statement, "The crash apparently was due to all three engines cutting out."

Imperial Airways asserted: "Imperial Airways deeply regrets their flying boat, City of Khartoum, flying from Athens to Alexandria, came down at about 30 miles off Alexandria and was lost. Hope must now be abandoned for there being any other survivors."

"Until the wreckage is salvaged and full inquiries made, the cause of the accident cannot be ascertained."

## Prepare For Emergency

Victoria.—Canada was warned by Premier Pattullo of British Columbia in a New Year's message to be prepared to face any contingency that may arise from European strife. The premier also urged development of the Dominion's export markets, a program of public works to relieve unemployment and an immigration policy.

## Woman Carries Mail

Juneau, Alaska.—A wisp of a woman is mushing 700 miles across Alaska's frozen tundras, carrying the mail to Fairbanks—"to see if a girl could do it." Mary Joyce arrived safely Dec. 31 at Tuleague at the end of the first lap of the trip which began at Taku, December 20, a message said.

## Commissioner For Palestine

London.—The reappointment of Sir Arthur Grenfell Wauchoppe as high commissioner for Palestine and Transjordan was announced by colonial secretary J. H. Thomas. Sir Arthur, who assumed his duties in 1931, thus will serve a second term.

## Riots in Cairo

Police And Troops Guard Public Buildings

Cairo.—Heavy detachments of police and troops were posted around British and Egyptian government buildings as 2,000 Nationalist students again paraded through the streets shouting "Down with England."

Nahas Pasha, Nationalist leader, said in an interview that British High Commissioner Sir Miles Lampson had informed him Great Britain was willing to open negotiations for regulation of the Anglo-Egyptian question.

He quoted Anthony Eden, foreign secretary, as informing the high commissioner that because of the international crisis he had been unable to undertake a complete study of the Egyptian question, but that Great Britain had no objection to negotiating with a constitutional Egyptian government.

In an effort to check the crowd of students pouring into the capital from the provinces, authorities closed all bridges across the Nile except Zaimak bridge, where strong detachments of police were centred.

Acting to halt a repetition of the demonstrations which, marked the opening of the 10th International Surgery conference, authorities put police guards around the convention hall and closed the University of Cairo's medical school until next week.

The government issued a warning to students that further disorders would be met by "energetic steps" and appealed to them to stop political agitation and return to their classes.

## Ends Long Railway Service

C.N. Engineer Completes 47 Years Without Demerit Mark

Edmonton.—When Tom Taylor, western Canadian National Railway engineer, brought in C.N.R. eastbound continental fier No. 2 from Edmonton Dec. 30 he ended 47 years in railway work—nearly half a century without mishap or demerit mark.

Engineer Taylor, as fit to-day as at 30, still can pass the stringent medical examination required for railwaymen. He steps down from his cab because of the retirement rule for railway employees which says they cannot work after 65.

## Starts Half-Holidays

Yorkton, Sask.—From New Year's Day until the end of August, Wednesday afternoons will be holidays for business houses and their employees in this city. At a council meeting city fathers passed the third reading of a bylaw putting this holiday in effect. Only one member of the council voted against it.

## Hospital 'Plane For Ethiopian

London.—First hospital plane to be sent to Ethiopia, completely outfitted with medical supplies and space to carry wounded, took off from Croydon airdrome recently for Addis Ababa. The plane is being presented to Ethiopia by the British Red Cross organization and the British League of Nations Union.

## Accepts Treasury Bills

Ottawa.—The Bank of Canada announced it had accepted on behalf of the finance minister tenders for the full amount of \$25,000,000 Dominion of Canada treasury bills due next April 1. The average discount price, the announcement said, was \$99.70549 and the average yield of 1.398 per cent.

## Epidemic In Manitoba

Winnipeg.—An outbreak of a mild type of scarlet fever in rural Manitoba was reported by Dr. C. R. Donnelly, provincial epidemiologist. In October, 267 cases were reported, 185 in November and 160 in December. In Roland public gatherings attended by children have been forbidden.

## Regulations Lified

Moscow.—Regulations which have barred children of "non-tollers" and disfranchised persons from Soviet high schools and colleges have been lifted by order of the government. Families of former kulaks, merchants and members of the political opposition will chiefly benefit. 2322

## FATALLY INJURED

G. F. Chipman, managing editor of the Country Guide, Winnipeg, and prominent Canadian newspaperman, who was accidentally shot to death while hunting rabbits on his farm Mr. Chipman was born in the Annapolis Valley, Nova Scotia.

## Pleased With Acclamation

Federal Minister Of Finance Expresses Thanks At Banquet

Charlottetown.—Minister of Finance C. A. Dunning expressed thanks for the acclamation that will send him to the House of Commons as one of Queen's county's two representatives.

His gratitude was voiced at a banquet of the Queen's County Liberal Association a few hours after nominations for the Queen's by-election had closed with only Mr. Dunning's papers on file. Conservatives had decided not to contest the seat thrown open when J. J. Larabee resigned so the minister could enter parliament. "I'll try to discharge my functions of judge in deciding what is justice for Prince Edward Island," Mr. Dunning said, "and I think it will be justice tempered with a measure of generosity."

## Departments Will Be Added

Two New Branches For Training Of Mounted Police

Ottawa.—Two departments will be added shortly to the Royal Canadian Mounted Police to place the force on a footing with Scotland Yard and the American government's G-Men, it was indicated by Sir James MacBrien, commissioner.

One branch will deal with scientific crime detection, featuring ballistic, photographic and pathological instruments. The co-operation of some universities will be sought in establishment of this branch.

A training school for constables will be established to instruct the men in crime detection, police duties and criminal law.

## WHEN HOARE RETURNED TO FACE THE "MUSIC"

Looking somewhat weary after his sudden rush from Switzerland to face the British people and explain his part in the defeated Anglo-France Peace proposals, we see Sir Samuel Hoare with Lady Hoare at Croydon Aerodrome, London. During his short holiday, Sir Samuel injured his nose, and we see the injured member covered with sticking plaster.

## Mayor Of Toronto

Sam McBride Is Elected To Chief Magistrate's Office

Toronto.—Sam McBride, mayor of Toronto in 1928 and 1929, was returned to the chief magistrate's office over two opponents in the civic elections.

Vanquished were James Simpson, Co-operative Commonwealth Federation mayor of 1935, and former Alderman Harry W. Hunt, owner of a chain of confectionery stores. Complete returns from the city's 763 subdivisions gave McBride 48,723 votes; Hunt 43,036; and Simpson 32,636.

Returns showed Ralph C. Day was high man in the vote for board of control, ensuring his return to office for another term. W. J. Wadsworth and W. D. Robbins, both members of last year's board of control, also were voted back into office, while former Controller George Ramdeen, who lost out in the mayoralty election in 1934, eased into the seat of board of control left open by Mayor-elect McBride's step up. Mr. McBride was a controller in 1935.

Toronto's mayor-elect is the dean of city council. He was elected alderman for ward three in 1905 and represented that district, the main business section of the city, until 1916. He served on board of control in 1918, 1919, 1926 and from 1932 to 1935.

## Conference To Continue

Several Committees Of Dominion-Provincial Farley To Meet

Ottawa.—A miniature dominion-provincial conference will open here this month to continue the work of the main conference, held earlier this month. Several continuing committees of the conference will meet, probably at the same time to consider financial relations between the Dominion and the provinces, the British North America Act, agriculture, mining and highways.

It is expected these committees will meet as early as possible so the result of their deliberations will be available when parliament assembles.

## Becomes Vice-Admiral

Duke Of York Has Received Promotion In Navy

London.—The Duke of York, second son of the King and a rear-admiral since 1932, will rank as a vice-admiral as from January 1.

The duke was an acting lieutenant in the royal navy in 1916 and became lieutenant two years later. In 1920 he was promoted commander and in 1925 received the rank of captain.

Since 1932 he has also held the rank of an air vice-marshal in the Royal Air Force and a major-general in the army. He is a personal aide-camp to the King.

## PROTESTS FROM ETHIOPIA ABOUT ITALIAN BOMBING

Imperial Ethiopian Headquarters, Dessale.—Emperor Haile Selassie called for "unpunished" Italy to be brought to account before the League of Nations for alleged poison gas warfare and destruction of a Swedish ambulance by Fascist war planes on the southern battle front.

"We again protest most explicitly against the criminal acts of the Italian government," said the emperor's note, relayed to Geneva from this field headquarters city, itself the target of Italian air bombs which struck a hospital and Red Cross tents Dec. 6.

The Negus charged specifically that Italian flyers, in raining explosives on the southern army of his son-in-law, Ras Desta Denu, near Dolo, used poison gas and completely destroyed a Swedish Red Cross ambulance laden with sick and wounded.

Other officials said numerous natives were gassed in the raid and that Dr. Hylander, chief of the Swedish Red Cross in the Ogaden, was wounded gravely.

## New Year Honors

No Canadians Appear In List Announced In London

London.—Two barons are raised to the rank of viscount, while the king has been pleased to create four new barons, two privy councillors and four baronets, it was announced in the New Year honors list. One Order of Merit and about four score knighthoods are also included in the long list of those whom His Majesty honors on New Year's Day.

After two years' inclusion, Canada again disappears from the list. In a special supplement of the London Gazette, the Union of South Africa and the Irish Free State are also unrepresented.

Extending over 18 printed pages the supplement covers the United Kingdom, India, the colonies and protectorates, as well as Australia and New Zealand.

Two of the king's sons appear in the list. The second, the Duke of York, is given a triple promotion becoming vice-admiral of the fleet, lieutenant-general in the army and marshal of the royal air force. The king's fourth son, the Duke of Kent, receives the Royal Victorian chain.

Elevated to be viscounts are Lord Hanworth, former master of the rolls, and Lord Trenchard, former commissioner of the Metropolitan police.

Lord Hanworth is a member of the Pollock family, famous in English legal history for the number of its judges and lawyers. Until recently, as master of the rolls since 1923, he presided in his hotel at the same time. Since foreign countries established legations here it had been their custom also to hold their receptions in the afternoon but the diplomatic corps' reception were in the forenoon.

## Ottawa Levee

Many Attend Governor-General's Reception On New Year's Day

Ottawa.—Nearly 1,000 men attended the governor-general's levee to shake hands with Baron Tweedsmuir and wish him a happy New Year. The most largely attended levee of recent years, it was held in the Hall of Flame of the parliament building beginning shortly after noon.

Next to the governor-general's levee, the largest receptions were those held by Premier Mackenzie King at Laurier House in the afternoon and that of Conservative Leader R. B. Bennett in his hotel at the same time.

Since foreign countries established legations here it had been their custom also to hold their receptions in the afternoon but the diplomatic corps' reception were in the forenoon.

## Makes Long Voyage

Melbourne, Australia.—The wind-jammer Joseph Conrad, world's smallest full-rigged sailing ship, arrived here after a voyage of one year from New York by way of the Cape of Good Hope and Singapore. The Joseph Conrad is owned by Alan Villiers, an aviator, writer, of Bay Ridge, Brooklyn, N.Y.

## NIGHTS OF THE BATH.

If there is any truth in the old saying that "cleanliness is next to godliness" then we must be a godly people, for we have an inherited and indoctrinated belief in the free and untrammelled use of hot and cold water (with a little soap). Many of us even brag about taking a cold bath every day. I think the bath tub could well be incorporated into our coat-of-arms, for its use has been woven into the very fabric of our civilisation. This popular indoor aquatic sport now shares a common glory with sleeping porches, shoe-shine parlors, chewing gum, hot dogs, exposed legs, bootleggers and other evidences of refinement and culture.

Some of this instinct for water (external use only) may have been inherited, but a lot of it came from early home training.

Back in my barefoot days, Saturday night was almost religiously regarded as "clean-up" night of the week. It was the time when anxious parents rounded up their recalcitrant offspring preparatory to the weekly purification. There was no evading this ablutional ceremony. No alibis were accepted—not even in summer, when we mendaciously magnified the number of times we had been in the old swimming hole. No matter how strenuously we protested that we were clean and spotless, once Saturday night came round we would be soundly soaked, soaped, scrubbed and scoured in conformance to established custom. A stern parental code decreed that we should be well and truly par-boiled before donning the Sunday raiment which was the hall-mark of family respectability. Regular attendance at Church and Sunday school was an imperative decree, and we appeared there clean, sanitary and aseptic, as befitted the offspring of staid and respectable burghers.

Very few homes in our town at that period had separate bathrooms. Porcelain tubs, shower baths, tiled walls and floors were unknown to us; there was no town water supply; the only running water in the bedrooms came thru a leaky roof during a rain storm. The standard and popular type of "bawth" was a wash-tub in the kitchen or wood-shed—the balance of the plumbing being located elsewhere.

Some time during the afternoon of the fatal day a couple of big iron pots would be filled with rain water from an outside cistern, and placed on a stove to heat. With a limited supply of water and unlimited supply of children, it was necessary to be economical.

This Saturday night ritual was a regular institution, established thru custom, necessity, and a certain amount of precaution. Under the detergent influence of soft soap and hot water accumulated layers of real estate were dissolved, and children's features again became recognizable and familiar to their parents.

While this aqueous ceremonial was more or less publicly perpetrated on the youngsters, our elders more modestly practised it in the sanctuary of their bedrooms. Whether the victim was of gaunt proportions or endowed with plenitude of blubber, it required considerable gymnastic ability and a lot of enthusiasm to stand in a few inches of water in a cold bedroom and make a satisfactory job of the operation. For centuries diseases of filth have taken a toll of millions of lives. It is hard to believe that when the practise of regular bathing was advocated as a means to health that many protested against it. They claimed that it robbed the body of those essential exhalations which are conducive to health and longevity.

Self respect and godliness thrive on the free use of soap and water. The "night of the bath" has become an integral part of our scheme of living.

### UFA May Quit Politics.

With resolutions both for and against continued political activity, the question of whether the United Farmers of Alberta should divorce itself from politics promises to be a major issue at its annual convention Jan. 21 to 24, in Edmonton.

Should forces opposed to continued political activity carry the convention, it would mean the end of a 16 year period in politics, 15 years of which saw the UFA in control of the Provincial Government.

A number of resolutions are on file at UFA headquarters in Calgary. Other resolutions from Locals are expected to arrive by the time the convention opens.

E J Garland, UFA-CCF member of parliament for Bow River from 1921 to 1935, will probably be the choice of the CCF party for permanent secretary of the organisation with headquarters in Ottawa.

On Monday last Hon. J. G. Gardiner was the successful candidate in the bye election contest in Assiniboia (Sask.) Federal Riding. Mr Gardiner is Dominion minister of agriculture. His opponent was Wm Irvine, CCF candidate, the former member for Westaskin Riding.

### One Bottle Does 'Em.

Druggist—Yes, sir; one bottle of this lotion will cure rheumatism.

Customer—How do you know that?

Druggist—Well, sir; no customers ever come back for a second bottle.

From Your Doctor  
if the "Pain" Remedy  
You Take Is Safe.

Don't Entrust Your  
Own or Your Family's  
Well-Being to Unknown  
Preparations

BEFORE you take any preparation you don't know all about, for the relief of headaches; or the pains of rheumatism, neuritis or neuralgia, ask your doctor what he thinks about it—in comparison with "Aspirin".

We say this because, before the discovery of "Aspirin", most so-called "pain" remedies were advised against by physicians as being bad for the stomach; or, often, for the heart. And the discovery of "Aspirin" largely changed medical practice.

Countless thousands of people who have taken "Aspirin" year in and out without ill effect, have proved that the medical findings about its safety were correct.

Remember this: "Aspirin" is rated among the *fastest methods yet discovered* for the relief of headaches and all common pains... and safe for the average person to take regularly.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

## SYNOPSIS

Here is an absorbing and exciting story of a fight against stubborn prejudice and a bitter personal malignancy—of a girl and a man battling ridicule, sabotage, bullets, and the treachery that would turn them against each other.

The story opens with Link Fleming addressing a meeting of Boone County cattlemen, called together with the object of forming an irrigation company.

Roper Kilgo, the boss of the Rawhide and nearby ranges, who seemed to approve the plan, but was really opposed to it, had forced Boak Township, a derelict mining engineer, whom Kilgo knew would be called upon to give his expert opinion in favor of the scheme, to reverse his earlier endorsement, and declare that irrigation in Boone county so far as Hamilton plan was concerned was only a new-fangled way to waste money.

The meeting terminates, but Buzz Hamilton and his sister, Helen, Link and Kilgo stay behind and Helen asks Fleming questions about his irrigation plan. This angers Buzz, who accuses Fleming of trying to influence his sister and, as he asserts, ruin his "spread". Buzz shoots at Fleming in an uncontrollable fit of anger, but Buster Townsend, Link's foreman, is shot in the stomach, and Fleming is uninjured. Buzz is arrested. The doctor attends Townsend and dresses his wound. Kilgo-Roper suggests taking Helen to her home, but she refuses and Fleming escorts her home instead. This incident causes Roper to declare open hostility to Fleming.

(Now Go On With The Story)

## CHAPTER IV.—Continued

Fleming's face was illumined momentarily as he lighted his cigarette. "I guess you're askin' for plain truth. Stephen may send Buzz away for awhile if he can. He's set against shootin', especially in town. Bent of anxious to make an example of everyone that does it. Ames is a mighty good law officer and he figures to keep trouble down by actin' kind of harsh. I'll sure do something about it if I can, but Ames goes his own way." Nobody can talk him

Medicated  
with ingredients of  
Vicks VapoRub  
VICKS COUGH DROP

out of anything." He was thinking that not even Kilgo could swerve the stern law officer.

The girl nodded, her slender fingers held worriedly to her lips. "Perhaps," she mumbled softly, "it will do Buzz good. Oh, I know how he is—his weakness. Buzz is easily led, and I just have a feeling he has come under the influence of someone the last two years, someone very strong-minded. It seems a terrible thing to say, and I don't want my brother put in prison." A shudder escaped her lips.

"But—well, perhaps punishment, a small amount of it, will make a new man of Buzz."

"That's what might happen, and I sure wish it would. I'll do anything I can for you while he's gone, Helen. I mean like helpin' with the Triple H."

"Thank you." Then thoughtfully: "I shall be in charge of the ranch, shan't I? I suppose I can do anything necessary to improve it or keep it up."

About to mount his horse, Fleming paused. He aquinted inquiringly at the lissome girl standing a few feet away, her face partly visible, partly in shadow. "What do you mean?"

"Why, Buzz and I own nine hundred acres out in the draw, don't we? Useless, barren land. Right next your seventeen hundred acres. How much do you suppose it would cost to dig irrigation ditches all through it, and build a small dam backing up Silver Creek into a sort of lake?"

With a low exclamation he dropped his reins and stepped nearer, to peer startledly down at her. "Do you mean you'd go against the advice of the only man who really knows irrigation around here—Torrey? And the advice of your own brother? And your—well, Kilgo?"

Helen tossed her head. "I don't know. How much do you think it would cost?"

"Offhand I'd say fifteen thousand dollars."

The girl placed a hand at her bosom. "I have the first thousand right here, Link. If the others don't want to come in, we could form a partnership, couldn't we? Now don't you think you'd better go home?"

As he rode up to the corral on his own ranch, Fleming still was immersed in thought of the plucky girl's offer. But he frowned as he reflected that she could not realize the weight of public sentiment against them. Everybody, ever eager to wag their tongues in speculation, would hint that the Star Loop owner had "talked Helen into it."

Dismissing, he unsaddled his buckskin and turned the animal into the corral. With saddle and bridle in his arms he started toward the ranch house. Yes, everyone would be dead set against it. There would be gossip aplenty that Link had made a fool of himself against her will, free prediction of bankruptcy and ruin.

He stopped suddenly. The saddle fell from his grasp and his hand sought the holstered stunner at his side.

"Don't get tough, Link—It's me, Roper." A short, thick figure detached itself from the shadow of the low stoop and Kilgo stepped into a pool of faint moonlight, grinning. "Just wanted a little talk with yuh," he went on easily. "Didn't mean to scare yuh, Link."

"I see." Surprise at the unexpectedness of the visit was masked in his next words. "Why sure, Roper, let's get inside and have a light."

He picked up his saddle again and carried it to the stoop. Leading the way into his four-room clapboard ranch house, he lighted an oil lamp on a centre table of the living room. "Make yourself at home," he invited his guest.

Kilgo appeared to have something on his mind. He stood fingering his cartridge belt while he shifted weight. "Say, Link, this here is kind of a hard thing to talk about. Fact is," he blurted out, "I planned on ridin' home with Helen Hamilton when she came. I mean, it kind of took the wind outta my sails when you went gallivantin' off with her."

"Yuh see, Helen and I—Before you bought the Star Loop, I'd known her quite a spell. Always got along together good and all that. Some folks around the county'd tell yuh we're as good as engaged."

"That so? I didn't get quite that impression."

He flashed a quick look. "Course I know you wasn't wise to it. It makes me plumb sore to have interference,

4 to 5  
TIMES  
MORE QUICKLY  
DIGESTED THAN  
COD LIVER OIL

Science has discovered why Scott's Emulsion of Cod Liver Oil is so much more beneficial than plain Cod Liver Oil. All plain oils are hard to digest; they must be emulsified in the stomach. We emulsify the oil in our Laboratories hence it is ready for almost immediate digestion and assimilation.

SCOTT'S  
EMULSION  
THE DIGESTIBLE COD LIVER  
OIL WITH THE PLUS VALUES  
For sale by YOUR DRUGGIST

Link—like it does any man, I reckon. I'm known for a guy that don't allow interference. Specially with steers and girls. Yes, we're just about engaged, all right," he repeated significantly.

There was a short pause. "She's mighty nice. Pretty, too. Noticed that myself, first look I had of her. Kilgo's eyes were envious. 'What I'm gettin' at is, I don't care to have you mix in my personal affairs, Fleming.'"

There was a translucent edge to his tone that the rancher did not miss. He tossed his hat on the table and rested a thigh over its corner. Swinging his leg idly, he examined Roper with keen, understanding eyes. It was a plain warning, a command that he had just issued, and it rubbed Fleming the wrong way.

"Seems almost like this engagement business is one-sided," he drawled. "However, I haven't any intention arguin' the matrimony question. By this way, Helen and I may go into partnership."

He started. "What do yuh mean?" "Why, when folks go into business together, that's called a partnership. That seventeen hundred acres you let me win in a crooked poker game some time back needs water. It's going to be worth a hundred, maybe two hundred an acre some day for alfalfa. Helen'll be in charge of the Triple H now, and she has more advanced ideas than Buzz. We're thinkin' of pooling our resources to put on an irrigation project of our own, seeing you and the others don't believe in good old-fashioned water."

The effect of this announcement was startling. Kilgo's jaw went slack and his eyes rounded in wonder. A low growl seemed to start in his barrel-chested chest, finally to burst from his lips with rage.

"Damn you!" he roared. "Yuh'll never do it! Suddenly lifting one pudgy hand, he snatched off his sand-colored smockers.

The sharp crack of a rifle was followed instantly by tinkling glass. Some impulse forever unexplained had made Fleming jerk from his seat on the table edge as Roper grabbed his hat. Perhaps he thought the visitor meant to whip out his six-gun—Link could not tell afterward. But the next moment the mass of brown hair on his head flicked sharply. The bullet's speed sent a light breeze along his temple and instinctively he

ducked. With a low thud the slug buried itself in the far wall.

"Don't move!" Brittle with stern tenacity, Fleming stared down the barrel of his forty-five. "Don't make another signal, understand? Get over there—against that window. If anybody's going to get shot by your slunk assassin, it ain't going to be me!"

He was safe from windows, himself. "What the devil yuh talkin' about? Yuh mean to say—"

"Grabbin' your hat was a signal. Some gent outside was waitin' for it. He tried to murder me. That's what I'm talking about, Roper!" The Box 50 owner's round, red face dulled. If it had not been that Link was covering him, watching his every move with hawk-like vigilance, he would have drawn and slain his host with vengeful speed. But there was no opening, no chance to accomplish it, and after an uncertain twitching of his thick shoulders the man grumped and forced resentment from his face.

"I—uh—goldam it, Link, you're all wrong! Say, I wouldn't fix up to murder anybody, man! What the devil—"

He waved his hands as if unable to express himself in words. "Come on, let's go after the guy. I'll prove to yuh I didn't—"

The door burst open and Waco Byrne, one of the Star Loop hands, stepped in gripping a sixgun in each hand. "Heard shootin', Boss, and glass. What happened?"

"Someone tried to get me, but he missed. Waco, you take two or three of the boys and go after him. He shot from the south; reckon he must have been behind the tool shed. That gent can't be far off yet. Grab him!"

The door slammed as the puncher hurried to comply. Fleming watched his visitor with sharp suspicion. Finally, concluding it was safe to do so, he holstered his gun. "Thanks for your offer to hunt that dry gulcher, Kilgo, but I guess my men can do the job all right. You in a hurry to go?"

As if mustering his courage, Roper shuffled forward. "Aw, that's a helluva way, suspectin' a guy," he protested. "If I wanted you dead yuh wouldn't have done it myself?" "Because I'm not so slow drawing, for one thing. And one of my men may have seen you come here, so it would be a bit hard to explain."

(To Be Continued)

## Vacuum Tubes Blamed

United States Naval Radio Experts

Give Cause Of Radio Interference

United States naval radio experts blamed an important tool of the medical profession for a persistent "shadow" interference with their high-frequency broadcasts.

Vacuum tubes used in X-ray and other machines by physicians were identified as the source of a tone heard principally on frequencies between 11,000 and 20,000 kilocycles.

The federal communication commission has been requested to control or eliminate the cause of the interference.

## Egg Canning

The term "canning" as applied to eggs is a relic of the days when the only source of artificial light was the candle. It was then customary to place a candle in a stovepipe and by passing the eggs before a small hole abreast of the light to separate the eggs that were clear from those that were dark or opaque. To-day all canning is done by means of strong electric light.

## ASK YOUR DOCTOR FIRST, MOTHER

Before You Give Your Child an Unknown Remedy to Take

Every day, unthinkingly, mothers take the advice of unqualified persons—instead of their doctors—on remedies for their children. If they knew what the scientists know, they would never take this chance.

Doctors Say PHILLIPS' For Your Child

When it comes to the frequently-used "milk of magnesia," doctors, for over 50 years, have said "PHILLIPS' Milk of Magnesia"—the safe remedy for your child.

Remember this—And Always Say "Phillips' Milk of Magnesia." When you buy, your child deserves it for your own peace of mind, see that you get it—Genuine Phillips' Milk of Magnesia.

Also in Tablet Form:

Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

PHILLIPS' Milk of Magnesia  
MADE IN CANADA

## Little Helps For This Week

Remember not the sins of my youth, nor my transgressions; According to Thy mercy remember Thou me, for Thy goodness' sake O Lord. Psalm 25:7.

When on my aching burdened heart  
My sins lie heavily;  
My pardon seek, new peace impart,  
In love remember me.

We need to know that our sins are forgiven, and the only way we can know this is to feel that we have the peace of God, that we are so able to trust in the divine compassion and infinite tenderness of our Father we are able to go to Him whenever we commit sin and say at once to Him "Father I have sinned, forgive me." To know we are forgiven it is only necessary to look into our Father's love until it sinks into our heart, to open our soul to Him till He shall pour His love into it, to wait on Him until we find peace, till the weight of responsibility ceases to be an oppressive burden to us, till we can feel that our sins, great as they are, cannot keep us away from our Heavenly Father.

## Length Of A Day

Two German physicians claimed three years of observations with a special clock has shown a day was 41,000 seconds less than 24 hours because of the varying speed of the earth's rotations.

The difference between a Christian and merely another church-goer is the weather. 2132

Appleford's  
Para-Sani

You'll save its modest cost before half the roll is used. That's because this heavy waxed paper keeps left-overs fresh, moist and flavorful. Ask for Appleford's Para-Sani because of the exclusive knife edge cutter on the box.

## With the Curlers.

The contest up at the curling  
rink is pursuing its steady  
course. It was thought the  
competition between the rinks  
manned by the President and  
boss of the V-Pres. would  
come to a close this week.  
The delay seems to be caused  
by the fact that the Vice pre-  
sident's rinks are a few games  
behind schedule, and it is not  
known when these will be  
run off. As Vice-president W  
Connolly and his team mates  
are indisposed at present.

## Obituary.

Mrs Mary Rosie Altheim, beloved  
wife of Henry Altheim, Stony  
Plain, passed away in Edmonton  
on Saturday, January 4, aged 26  
years. She leaves to mourn her  
loss besides her husband, 2 sons  
Erwin Henry and Harold Regin-  
ald; also her parents, Mr and Mrs  
V. Millar; 5 sisters, Mrs H. Millar,  
Mrs P. Goertz, Mrs E. Breitkreutz,  
Mrs T. Fuhr, Miss L. Eillar, Miss  
M. Millar; 2 brothers, Otto Millar  
and Emil Millar.

Mary Olive Brown, beloved wife  
of Daniel Brown, of Graminia,  
passed away in an Edmonton hos-  
pital on Sunday, Jan. 5, aged 56  
years. She is survived by her hus-  
band, 1 daughter, Mrs F. Berthi-  
aume, Graminia; 3 brothers, Geo.  
Groat, Alex Groat, Tom Groat.  
A funeral service was held in Ed-  
monton on Wednesday, and in-  
terment was made in Spruce Grove  
cemetery.

## Alberta Basic Dividend Ass'n (Edmonton Journal).

Demand will be made by a large  
delegation soon after the session  
of the Alberta House opens on  
February 6 for payments of the  
\$25 dividends which, it is felt, was  
promised by Premier Aberhart  
during the provincial election cam-  
paign, says A S Shandro, organ-  
izer for Alberta Basic Dividend As-  
sociation.

"We are preparing to organize  
locals all over the Province to  
carry on the work," says Mr Shan-  
dro.

The organizer says that he has  
received numerous inquiries con-  
cerning the work of the Association.

The office of the Association,  
formerly in the C.P.Ry. buildings,  
has been moved to the Alberta  
Hotel.

## Straw Vote on Feb. 6.

A "straw vote" to find out how  
many people are listening to Sun-  
day radio broadcasts by Premier  
Aberhart and Hon. E C Manning,  
will be held Thurs., Feb. 6th, ac-  
cording to an announcement re-  
cently made by Mr Aberhart.

Postcards will be used to ascer-  
tain the number who listen in to  
the Calgary broadcast in the after-  
noon and the Edmonton broadcast  
at night. Those listening to both  
broadcasts are to be asked to mail  
2 postcards—1 to each city.

## Meetings Deferred.

It is stated that a notice  
has been issued to the school  
boards thruout the Province  
by the Dept. of Education,  
advising that the closing of  
the boards' books be deferred  
until a month later than the  
usual closing time, thus al-  
lowing delinquent ratepayers  
a further period in which to  
make a settlement.

Some Boards are said to be  
taking advantage of the ex-  
tension, and some, apparent-  
ly, are not, as, for instance,  
the Board of Glory Hills S.D.  
which has called the annual  
meeting of the ratepayers, to  
be held Saturday next, Jan.  
11th.

## New Bank Code for 1936.

At the outset, states a con-  
temporary, we would have it  
understood that we can't do  
anything toward getting a  
mortgage renewed or getting  
a loan on a vacant lot or on  
some stocks or bonds. That  
understood, we feel safe in  
saying we are the friend of  
a friend of a bank director, and  
therefore have been handed  
"The New Bank Code for  
1936," which the B.D. handed  
to our friend.

The Code is for customers  
It goes like this:

- 1—Entering bank:  
Front door ..... \$9 50  
Slamming door ..... 25
  - 2—Speaking out of turn:  
To manager ..... 1 00  
To cashier ..... 50  
To assistant cashier ..... 25
  - 3—Using rough language  
to draft bearer ..... no charge
  - 3—Asking for balance ..... 1 00
  - 4—Arguing over amount  
of balance:  
In civil manner ..... 50  
In quarrelsome manner:  
1st time ..... 2 50  
Thereafter ..... 5 00
  - 5—Keeping messages from  
curling or golf games ..... 25 00
- The Code does not specify that  
these sums will be applied to the  
small depositors.

## Weak with the Grippe.

Miss Anna Repko, 10845 98th St.,  
Edmonton, writes:  
"I was so weak with the Grippe  
that it made me quite helpless. A  
friend told me to try Dr. Martin's  
Tonic Remedy. And it certainly got  
me on my feet, and built up my  
strength. That I wish to let everyone  
know of this Remedy. How quickly it  
acts and how reliable it is. Children  
will take it readily, no mixing or  
using. It contains no Laxatives or  
or Narcotics. A quick acting tonic  
that builds up your Vitality. Dr.  
Emile Martin's valuable remedy for  
Coughs, Colds and La Grippe. Large  
bottle, price, 75c., at Hayes Drug Store,  
Stony Plain.
